

Estate Division Problem

Larry, Mo, and Curly are the heirs to an estate that consists of a deeded timeshare, a Jeep, a 4-piece furniture suite, and \$8,000 in cash.

Their bids are shown in the following matrix:

	Timeshare	Jeep	Furniture
Larry	\$2,350	\$3,600	\$450
Mo	\$4,800	\$2,200	\$300
Curly	\$3,500	\$2,450	\$150

After dividing up the estate fairly, what will each person end up with?

Larry:

Mo:

Curly:
